AB In this report, it is shown that the rolling circle replicon pG(+)host and
 the theta replicon pIP501 are thermosensitive in *Lactobacillus*
delbrueckii subsp. *bulgaricus* (*Lactobacillus bulgaricus*). Using a
 pIP501 derivative as a delivery vector for six insertion sequences
 originating from lactic acid bacteria, it is shown that IS1223 and IS1201
 transpose in *L. bulgaricus*.

L2 ANSWER 2 OF 3 CAPLUS COPYRIGHT 2004 ACS on STN
